

FSL has doubled the size of its security parking facilities to more than 150 vehicles due to demand for the service from its clients. FSL can park anything from a small car up to and including articulated vehicles. FSL can also arrange transportation of vehicles anywhere in the UK either by fully insured drivers or vehicle transporters, including vehicles that do not drive. Both long and short term stays can be catered for.

COVID-19 has increased the requirement because not all businesses have the space to park vehicles that are normally used by furloughed workers. Both parking facilities are monitored remotely 24/7 by CCTV with manned guard attendance as and when required.

More Than Just Secure Storage

Once vehicles arrive, FSL can offer more than just storage, we can tailor a service that suits your needs. If you require receiving inspections, equipment removal or installation, re-branding, decommissioning or re-allocation preparation all of this is possible.

If you would like further information please email tls@fleetservice.co.uk
