

FSL converted this Mercedes-Benz Sprinter into a fully equipped ice cream van, designed to provide an efficient and professional mobile catering solution. The conversion includes a fitted freezer, a soft ice cream machine, purpose-built storage cabinets, a dedicated food preparation area, and a convenient serving hatch for fast customer service.

Every aspect of the layout has been carefully planned to maximise workspace, storage, and operational efficiency while maintaining the high standards of quality and craftsmanship expected from an FSL vehicle conversion.
